

Optimize Decision Value

Hans Læssøe

#RISKWARENESSWEEK2019

RISK
AWARENESS
WEEK 2019

Agenda

Optimize decision value
Hans Læssøe / AKTUS

Introduction to decision risk management

How ... the “TIPA” Approach

- Targeting
- Identification
- Prioritization
- Action

Balancing your efforts

Develop a culture of intelligent risk taking

Execution vs. decision risk management

Optimize decision value
Hans Læssøe / AKTUS

SCOPING

- **Execution risk management** focuses on managing risks, which have already been taken by decisions made and/or actions taken
 - ... as such, it is often reactive in nature
 - ... it inherently supports decisions being made
- **Decision risk management** focuses on supporting decision making by ensuring the risk profile is known for decision making
 - ... as such, it is presumed being proactive
 - ... it inherently challenges decision about to be made

Decisions comes in two steps ... how to optimize value

Optimize decision value
Hans Læssøe / AKTUS

- **Elements of a decision**
 - What to do
 - How to do it
- **Focus on “how to do it”**
 - There is a safe approach to every task
 - It is about “winning” not about “not losing”
- **Find the optimal, risk planned, approach to every option**
- **Prioritize based on your risk appetite**

TIPA approach in overview

Optimize decision value
Hans Læssøe / AKTUS

- **Targeting**
 - What do you want to achieve what is success
- **Identification**
 - What may affect your missing, meeting or exceeding your objectives
- **Prioritising**
 - What do you chose to act on, how
- **Action**
 - Go execute

Targeting ... putting the horse before the cart

Optimize decision value
Hans Læssøe / AKTUS

- I have seen too many decisions are based on “We will ...” without consideration as to what the desired/planned/expected outcome of this may be
 - Action for the sake of doing something
 - Riding a hobby horse
- **How do we recognize a success**
 - By what metric(s)
 - How do we measure
- Draft a plan of HOW to meet this/these tangible objectives
- Risk impact must be measured in term of the target metric(s)

Identification ... needs to be holistic to be valid

Optimize decision value
Hans Læssøe / AKTUS

Executing on the plan ...

- What may hamper meeting objectives
- What may help meeting/exceeding objectives
- Leveraging a 10 mio opportunity is as good and valuable as avoiding a 10 mio risk

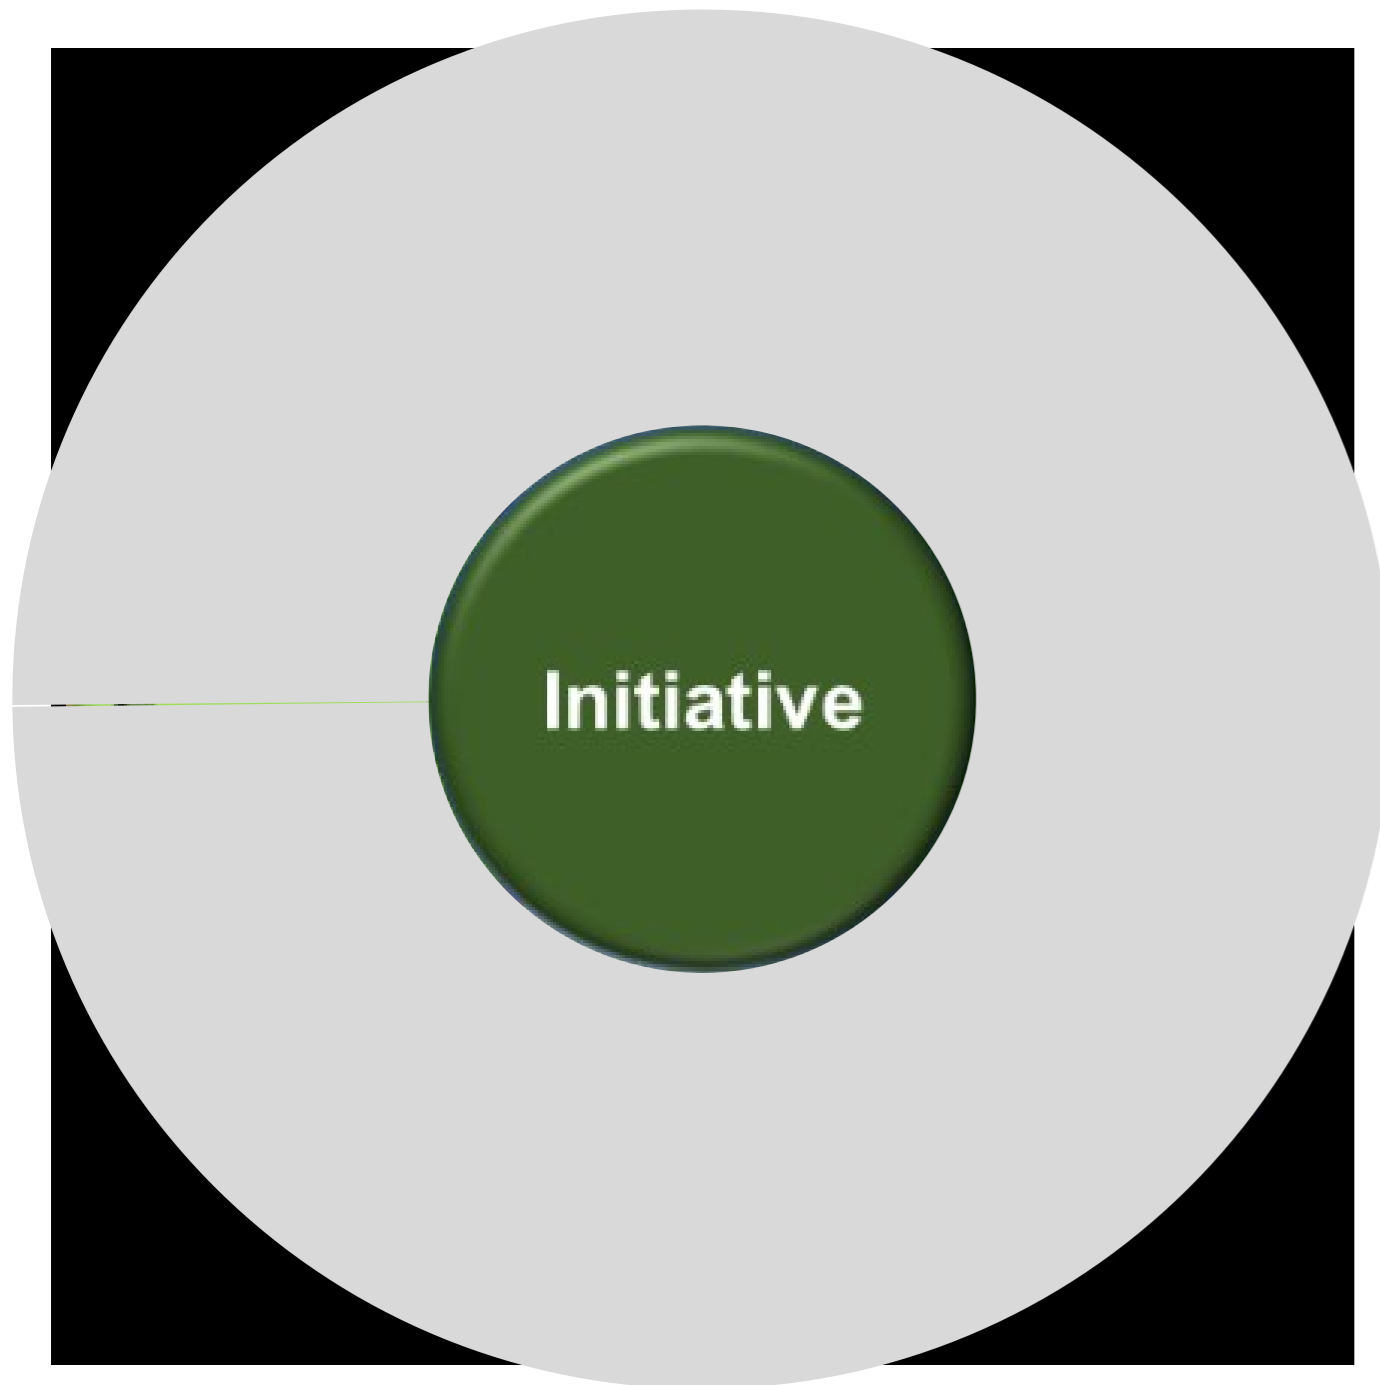

BE HOLISTIC

Many decisions fail because things happened that were fully foreseeable, yet never considered

Identification ... direct risks and leverages

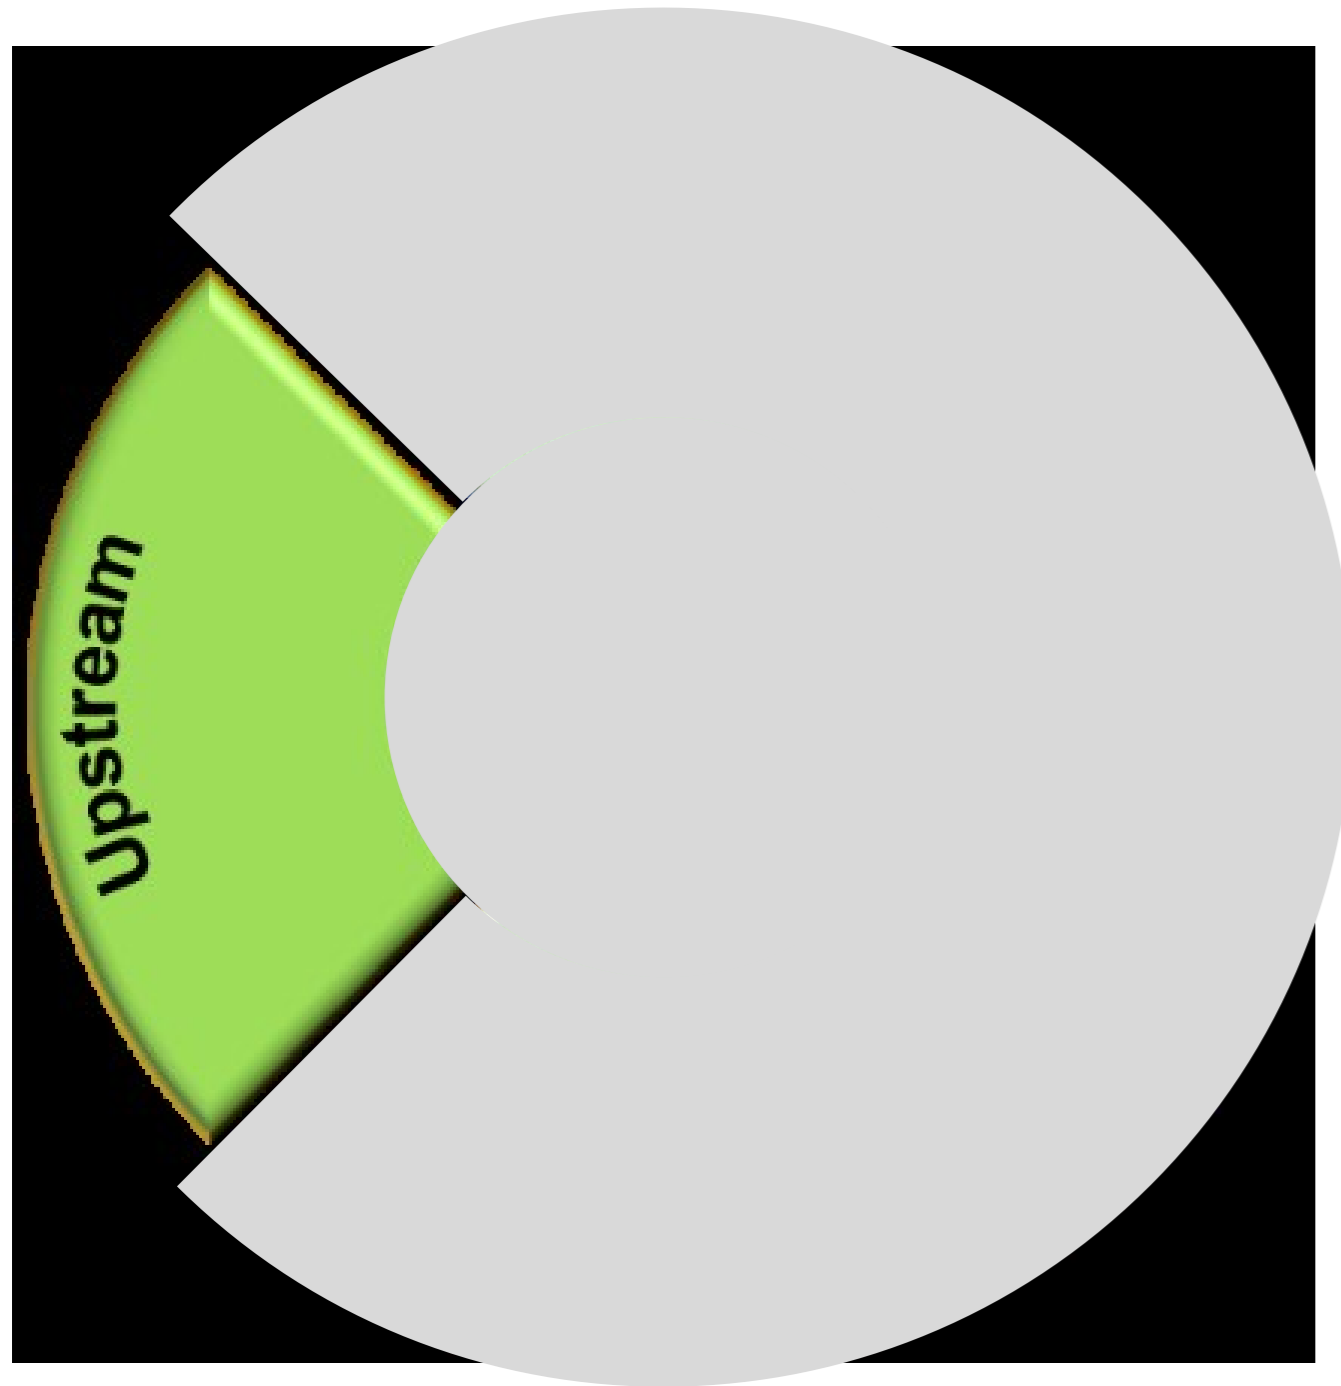

Optimize decision value
Hans Læssøe / AKTUS

- The “**project**” management
 - Scope
 - Time
 - Resources
- The “**change**” management
 - Who need to so what differently
 - Involvement
 - Support / Obstruction
- What may help/hamper our meeting objectives

Identification ... Upstream

Optimize decision value
Hans Læssøe / AKTUS

- What happens “before” the process/area we are changing
- Which vendors do we have
- What are we “buying”
- What may help/hamper our meeting objectives

Identification ... Downstream

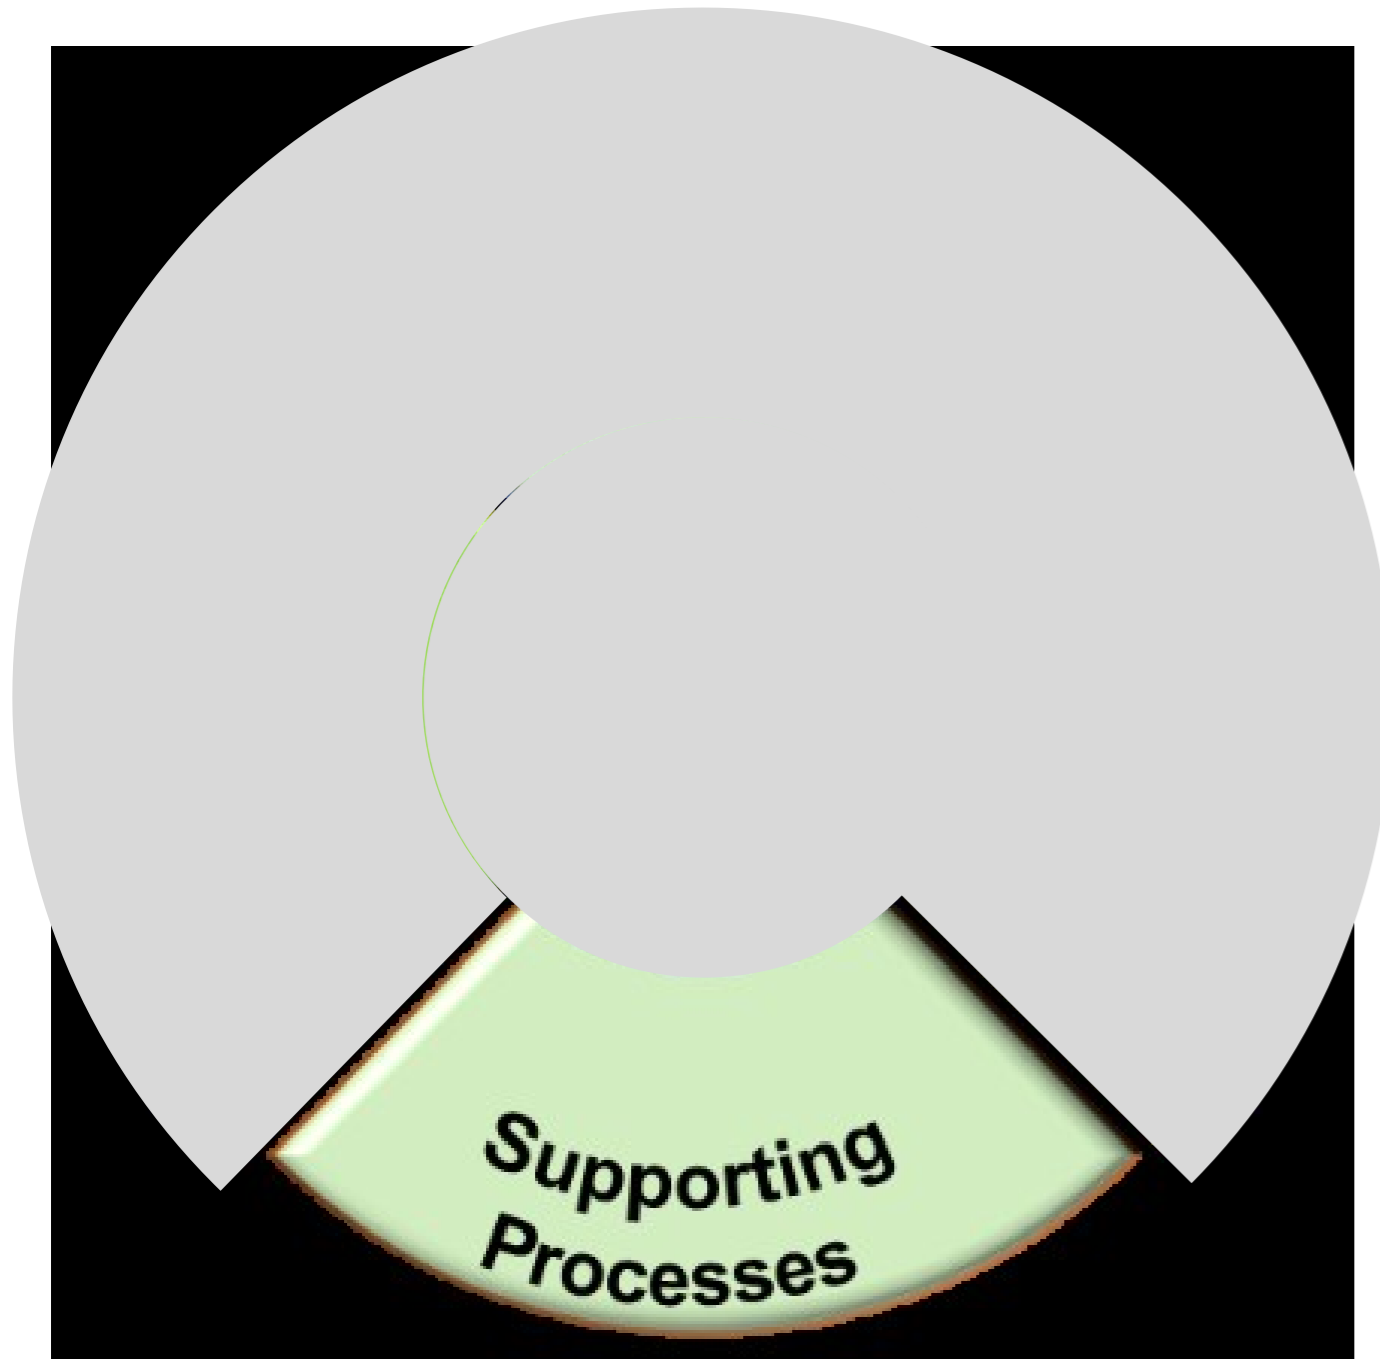

Optimize decision value
Hans Læssøe / AKTUS

- What happens “after” the process/area we are changing
- Which customers/users do we have
- What are we delivering
- What may help/hamper our meeting objectives

Identification ... Supporting processes

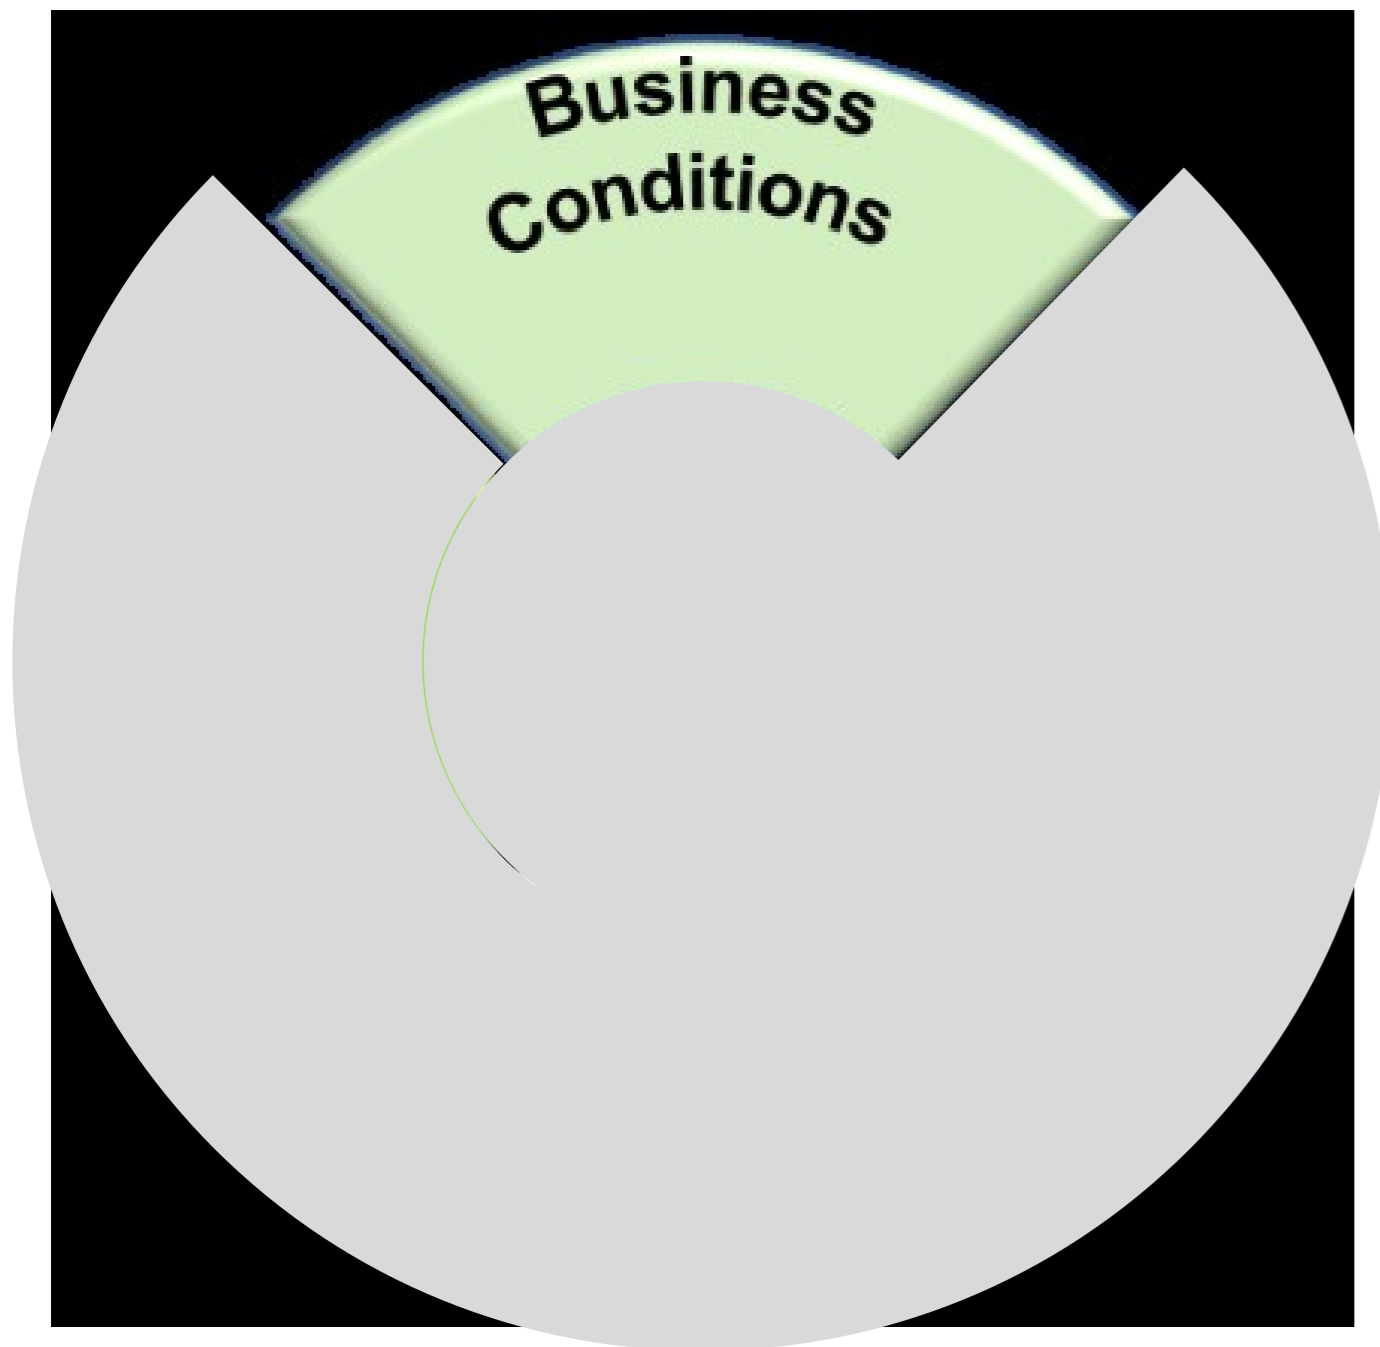

Optimize decision value
Hans Læssøe / **AKTUS**

- Internal to the organisation
- Which processes do we rely on
 - IT
 - Finance
 - Legal
 - HR
 -
- What may help/hamper our meeting objectives

Identification ... Business Conditions

Optimize decision value
Hans Læssøe / **AKTUS**

- External to our organisation
- Which business conditions are we subject to
 - STEEP
 - Competitive landscape
 - Potential disruptors
 -
- What may help/hamper our meeting objectives

Prioritizing ... a modelling exercise

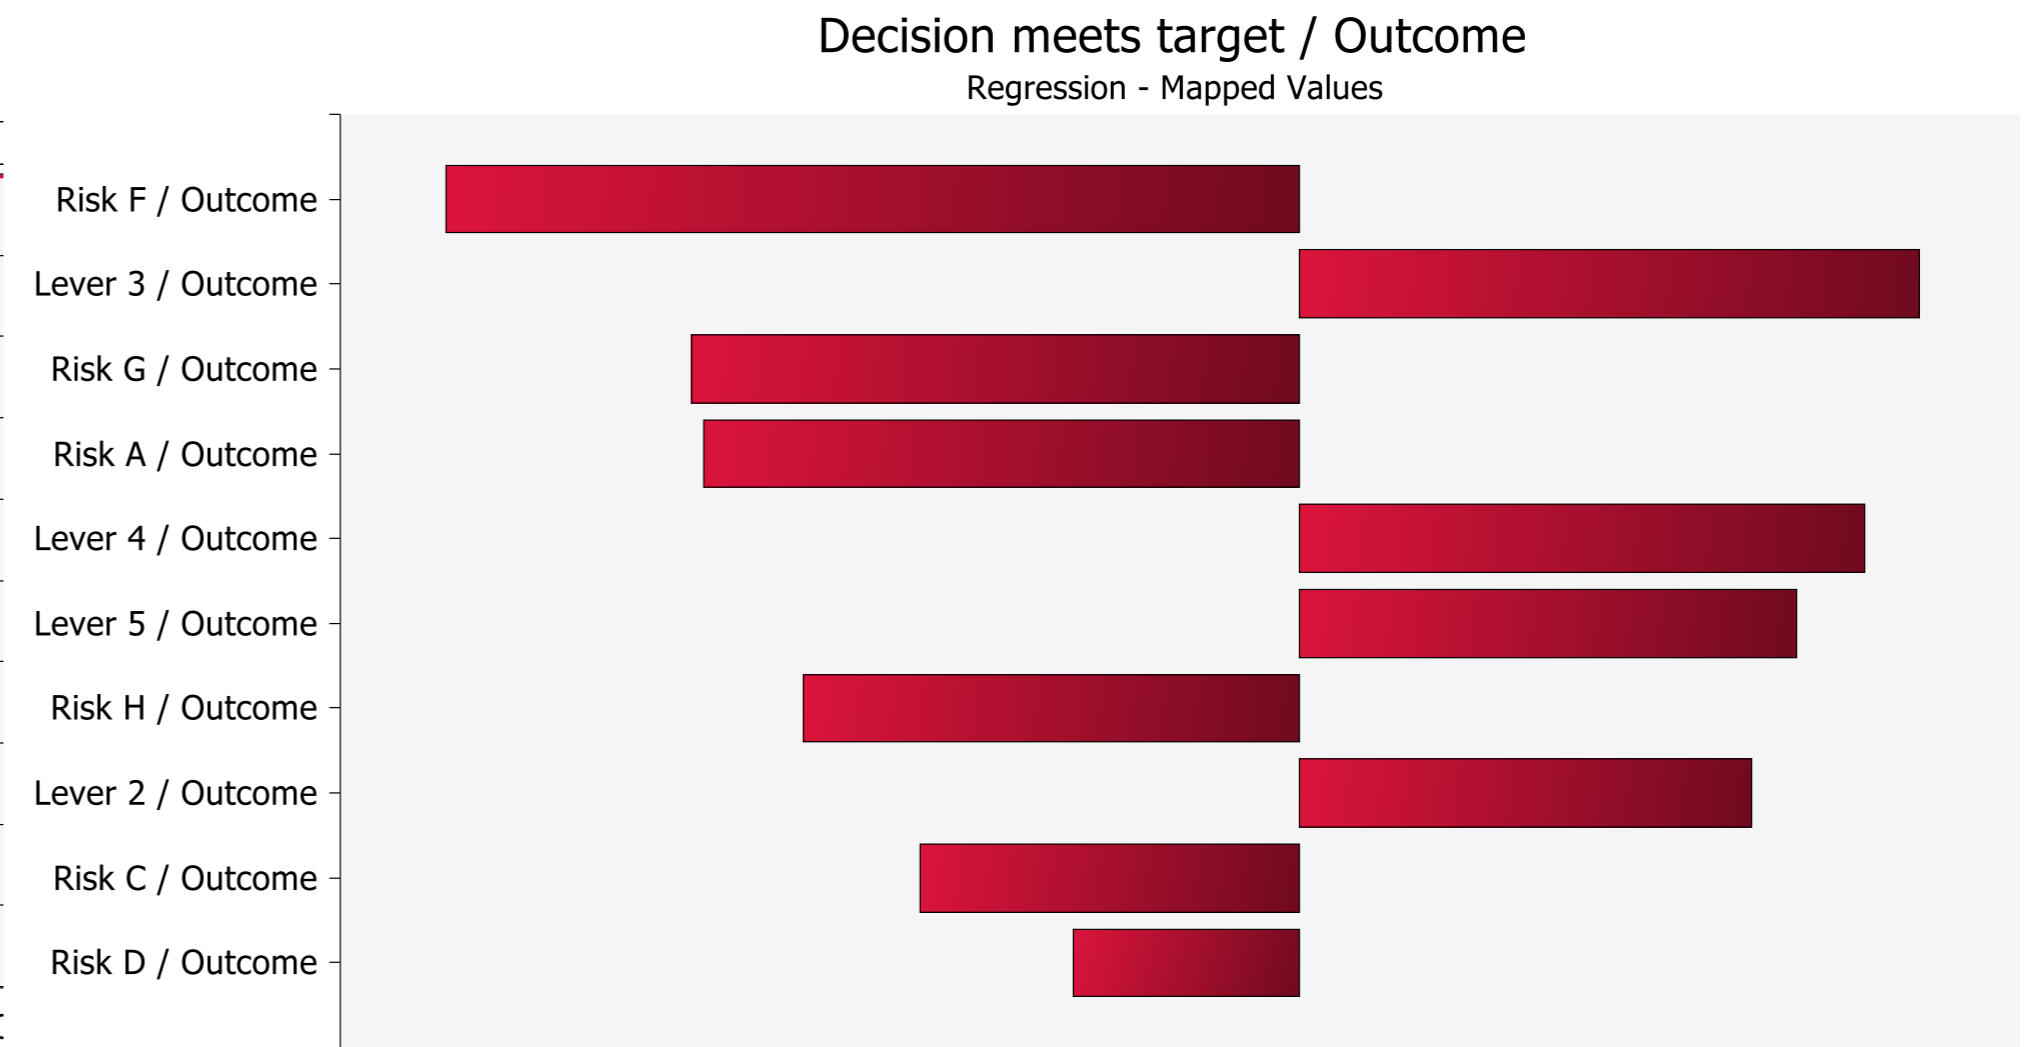

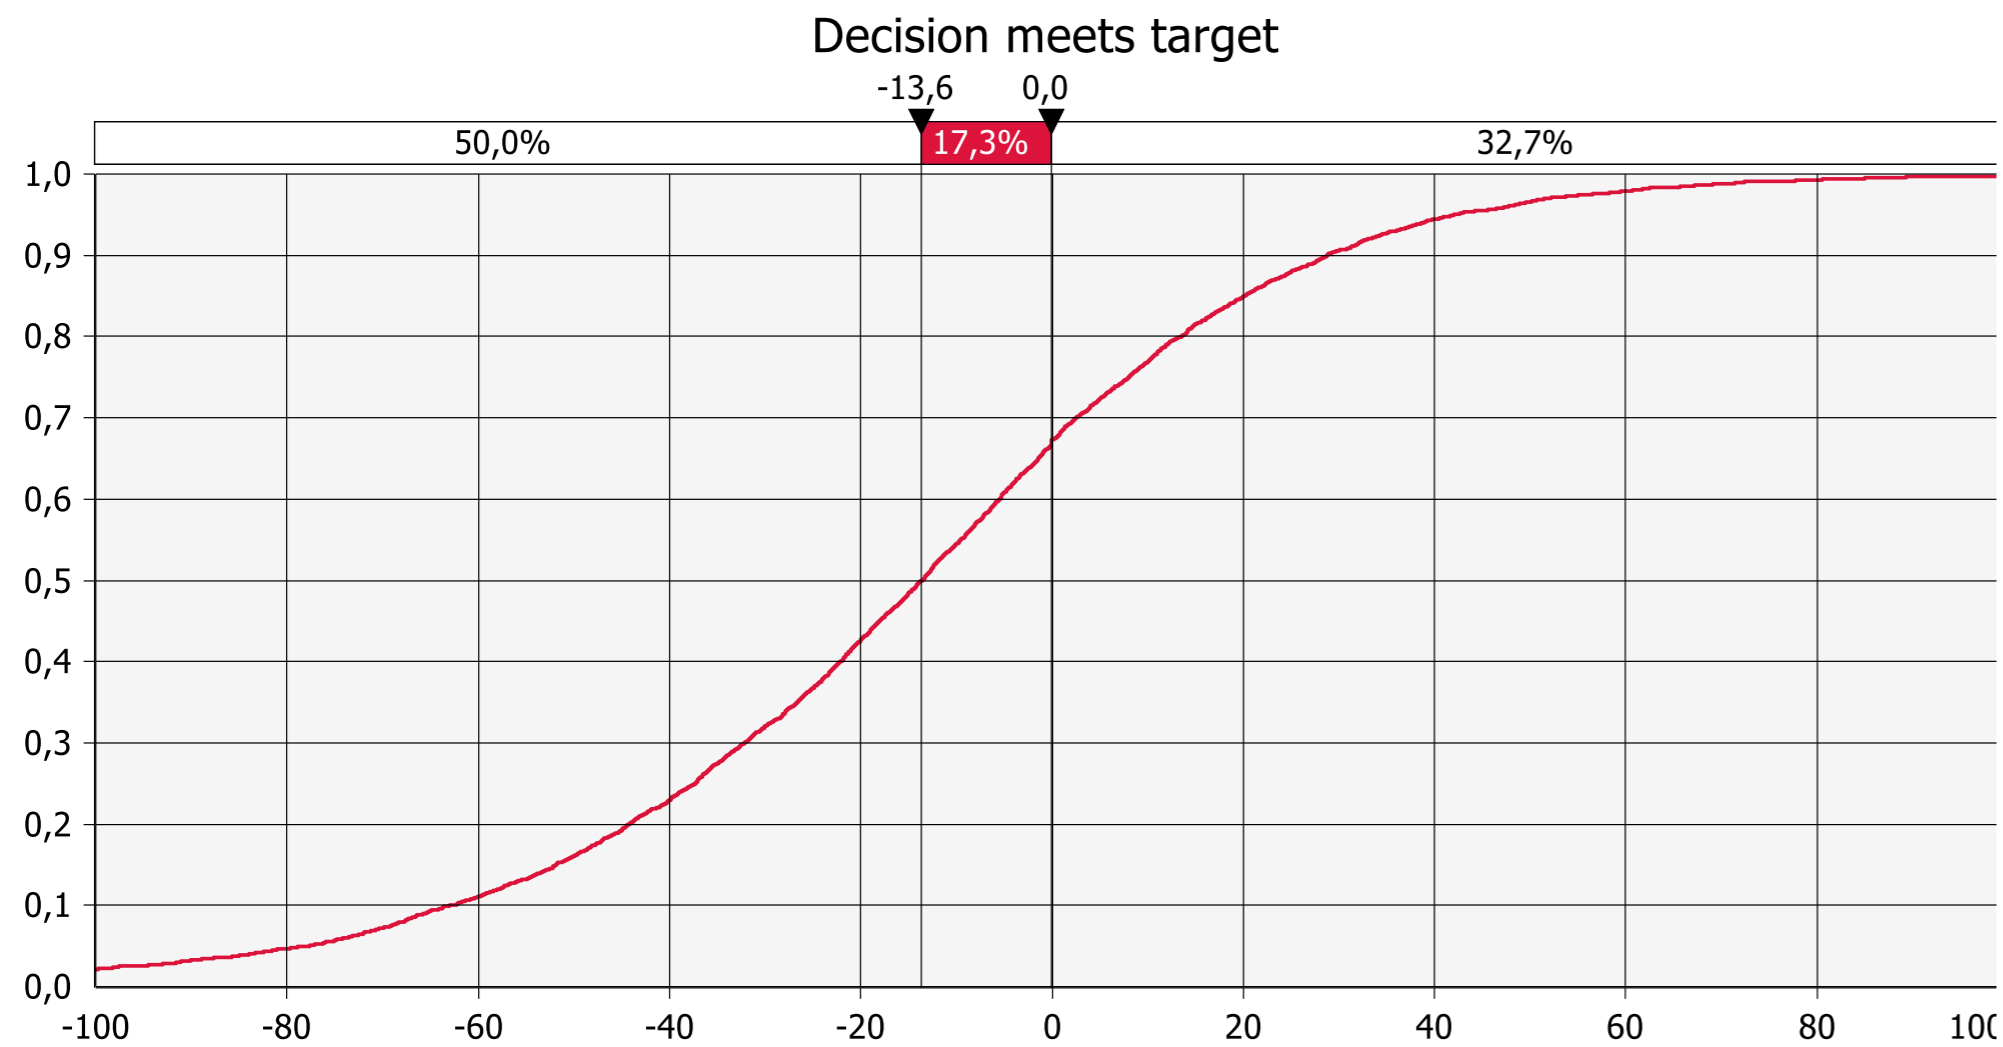

Optimize decision value
Hans Læssøe / AKTUS

- **Modelling and Monte Carlo simulation is a MUST**
 - Red/Amber/Green is useless
 - Heatmaps are even more dangerous than useless
- **Measure/Analyse – do not guess**
 - Qualitative estimates are useless
 - Quantitative estimates are biased
- **Model each risk/opportunity**
 - What is the impact distribution if it materializes
 - What is the likelihood it will materialise at all
- **Add this to your decision model**

Prioritizing ... Monte Carlo simulation gives two valuable results

Optimize decision value
Hans Læssøe / AKTUS

Your likelihood of meeting target

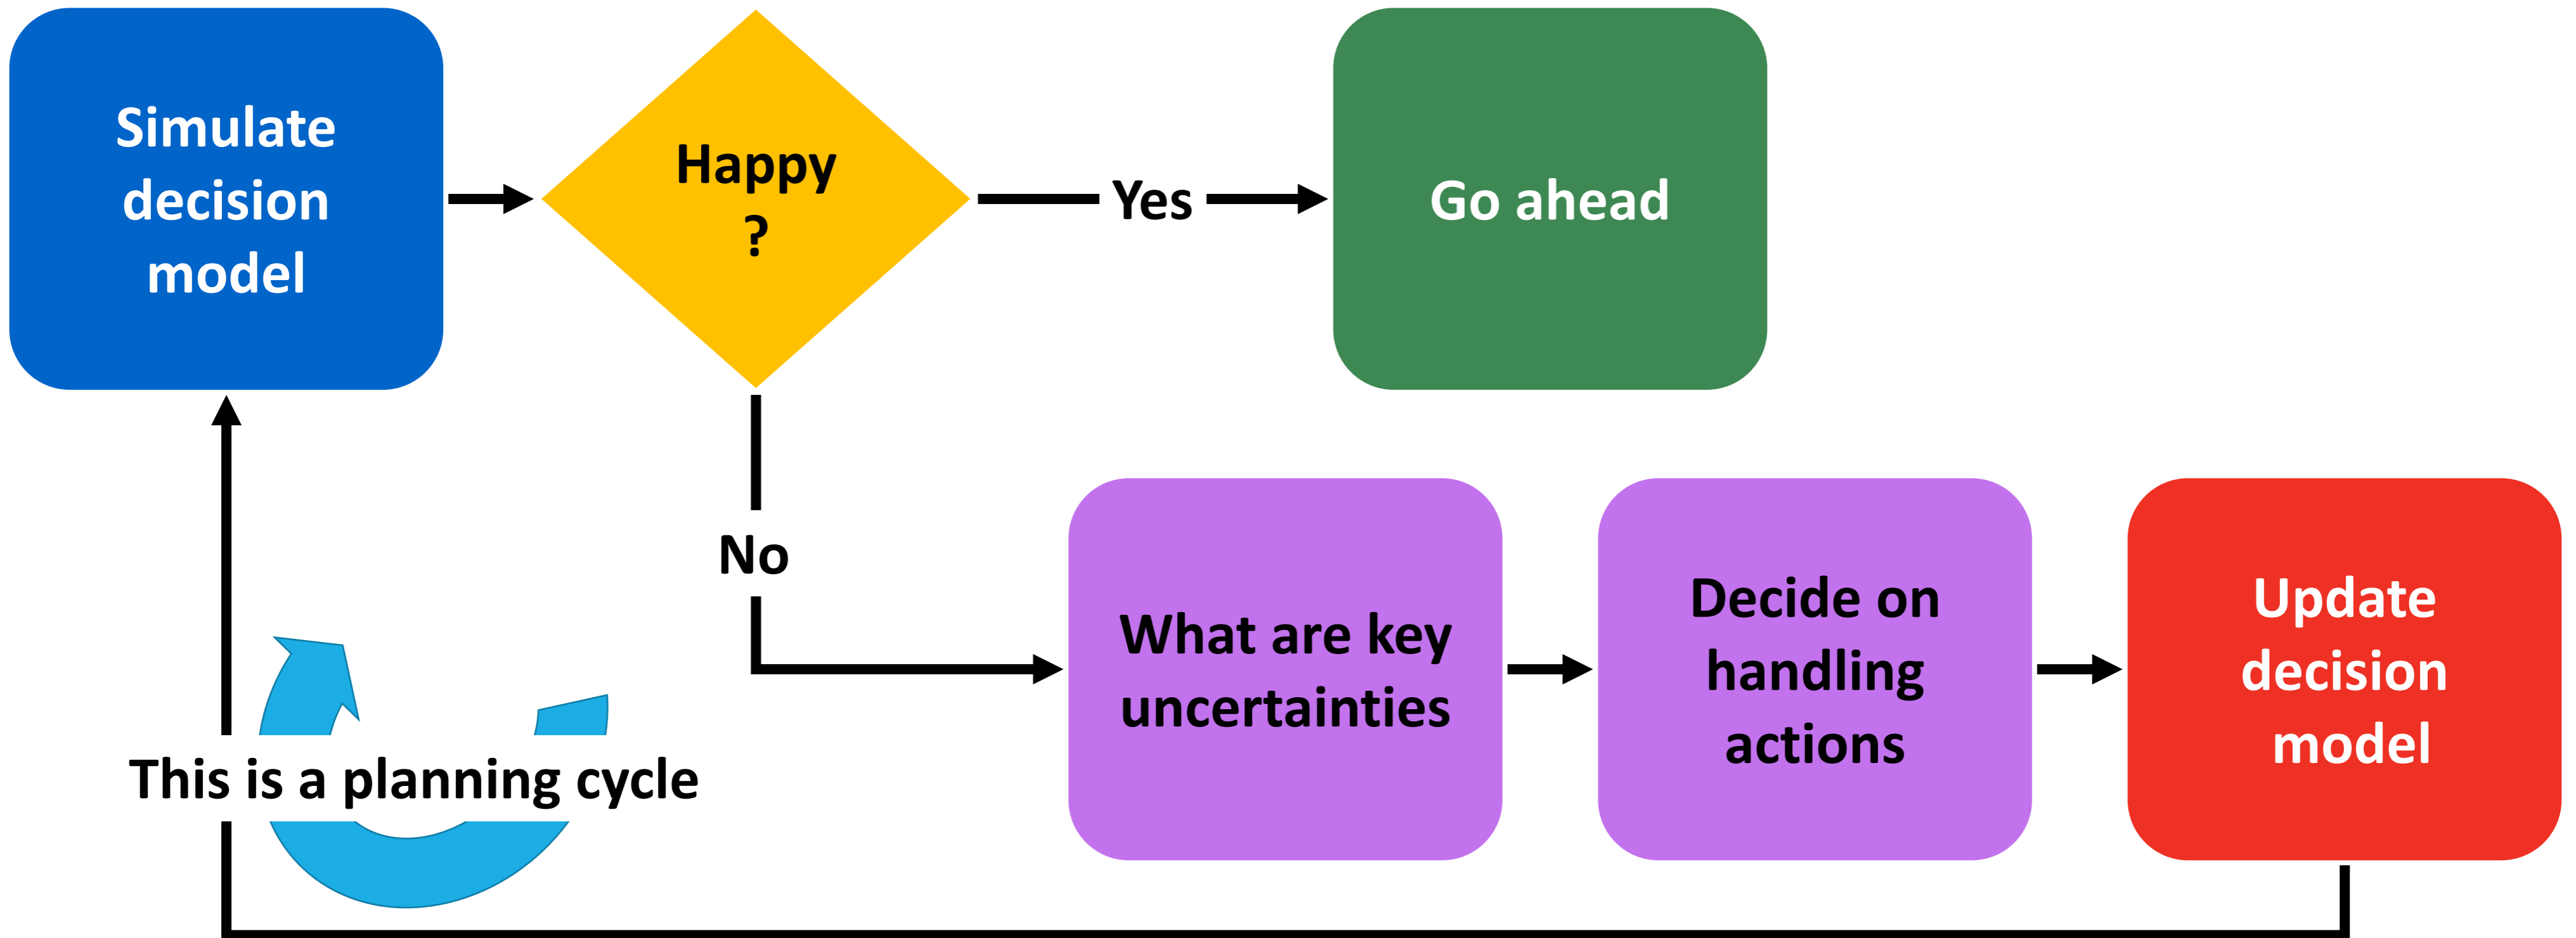

- Here shown as 32,7%
- Median outcome is -13,6 vs. target

Your key uncertainties

- Key risks are F, G and A
- Key levers are #3, #4 and #5

Prioritizing ... leveraging the results to optimise outcome

Optimize decision value
Hans Læssøe / AKTUS

Action ... Navigate real life

- You now have an optimised plan
 - Go ahead, get started
 - Monitor developments and changes
 - Update your plan and model
 - Decide on net steps
- ... Iterate your way to a successful outcome**

No plan survives first contact with the enemy

Helmuth von Moltke the elder

Optimize decision value
Hans Læssøe / AKTUS

Balance your efforts

Optimize decision value
Hans Læssøe / **AKTUS**

Tactical decisions

- Discuss with stakeholders
- Analyse and leverage facts
- Be risk aware

Frequent/known decisions

- Think it through
- Discuss with key people
- Be confident

Strategic decisions

- Ensure a valid decision base
- Be thorough and systematic
- Be cautious and adaptable

Develop a culture of intelligent risk taking

Optimize decision value
Hans Læssøe / AKTUS

- Culture defines “How we do things here”
- Be systematic on optimising decision value
- Build a culture, where everybody does this ... and would not consider “jumping the fence”
- Build a winning culture based on intelligent risk taking

HOW

- Consistency, consistency, consistency

Summing up

Optimize decision value
Hans Læssøe / AKTUS

- Decisions have two elements
 - What to do
 - How to do it
- Leverage the TIPA approach to decision optimization
 - Target
 - Identify
 - Prioritize
 - Act
- Be adaptable in your implementation
- Be consistent, and build a culture of intelligent risk taking

Optimize Decision Value

Hans Læssøe

#RISKWARENESSWEEK2019

**RISK
AWARENESS
WEEK** 2019

Thank You ...

**If I can help,
reach out**
